

Summertime, and the livin' is easy—except for these puzzles. Have fun with this latest assortment by Fraser Simpson, creator of *The Globe and Mail's* Saturday cryptic crossword

WORD PLAY

Fill this flower with 32 words that answer the clues. Enter each word inward from the tip of the petal to the centre of the bloom, one letter per space. Half the words proceed clockwise from the numbers, and the other half go counterclockwise. Use both sets of clues to get a full bloom.

- 1 Blah
- 2 Examining, with "over"
- 3 Vegas house
- 4 More plodding
- 5 Military groups
- 6 Cinco de Mayo party
- 7 Equilibrium
- 8 Fistfight souvenir
- 9 Figure enhancer
- 10 Quarrelled for generations
- 11 Long
- 12 Popular nut
- 13 Church leader
- 14 Container with staves
- 15 "Yay!"
- 16 Heading

- 1 Use a public library
- 2 Tea party host
- 3 Pen
- 4 Louisiana county
- 5 For pi radians, it's negative one
- 6 Crying when you weren't hurt, e.g.
- 7 Aluminum _____
- 8 Music system
- 9 Drink after a shot
- 10 Imposes (upon)
- 11 Medical rupture
- 12 Political movements
- 13 Cater basely (to)
- 14 Picnic carryall
- 15 Chopped for cooking
- 16 More brusque

Use the randomly listed clues to fill in this small crossword puzzle. Each letter of the alphabet will appear exactly once in the completed grid.

- variety
- peer
- carton
- cotton fabric
- pep
- stares in amazement
- Norwegian inlets

A B C D E F G H I
J K L M N O P Q R
S T U V W X Y Z

Add a letter to the first set of letters below and form a common word by anagramming the six given letters plus the one you added. Enter the word in the squares to the right. For each succeeding row, add the last letter of the previous word you wrote to the new set of letters before anagramming. The last letter of your fifth word should be the letter you added to the first word. Only word play experts will complete this daisy chain of anagrams!

1	A	D	I	M	S	T	__								
2	E	G	H	O	S	U	__								
3	I	N	O	R	S	V	__								
4	A	C	D	I	M	Y	__								
5	A	B	I	O	R	U	__								

ILLUSTRATIONS BY IOREN CULL

Slide the 18 letters surrounding the grid into the empty squares so that four words are formed reading across and five words are formed reading down. Letters above and below the grid slide vertically to any position without changing columns, and letters to the left and right slide horizontally to any position without changing rows. Each exterior letter is used only once. Two additional letters are already positioned in the grid. Can you slide all of the others into place?

	N	C	I	E	G	
E	P					S
T						A
R						N
D					Y	E
	W	A	R	T	D	

Catching a code

We've taken five common six-letter words, listed in alphabetical order, and disguised them using a random substitution cipher. We'll tell you that L stands for N, and Z stands for H. Can you determine the words?

V J X L Q F _ _ _ _ _
 S W Z L D V _ _ _ _ _
 Q L D O Z W _ _ _ _ _
 J S O O X S _ _ _ _ _
 W F J X L W _ _ _ _ _

Wordless

In each of the three puzzles below, you've been given three guesses at a secret word. Any letter that appears in the secret word in the same position as in the guess has a square around it. Any letter that appears in the secret word in a different position than in the guess is circled. Letters without circles or squares are not in the secret word. Can you determine all three secret words?

Puzzle 1

T (H) (R) O W
 G O D (L) Y
 S (C) A N T

Puzzle 2

C L (E) A N
 S (I) X (T) Y
 S L U S (H)

Puzzle 3

M A (I) Z E
 L (I) K E D
 U S A (G) E

Ribbon

The answers to the clues are all four-letter words, listed in no particular order. Fill the ribbon with the words overlapping by two letters, like ACHY and HYMN in the example. We've supplied the first and last letters of the ribbon. Can you piece the words together?

CLUES ■ chomp ■ milk choice ■ brick brand ■ foot part ■ line of rotation ■ salty drop
 ■ hazard ■ Mongolian desert ■ Wight, for one ■ huge-screen film format

Tapestry

Weave a tapestry of words beginning in the top-left square of this grid. The Warp answers proceed in order back and forth with no breaks between the words, changing direction as they flow downward to each new row. The Woof answers proceed in order down and up, changing direction as they flow rightward to each new column. The numbers in parentheses after the Woof answers are the answer lengths. We've filled in the first Warp answer to get you started.

WARP CLUES

Filled tortilla
 Makes reference (to)
 Conical home
 Huge-selling 1982 album
 Greek column style
 Distinguished
 Greatly feared
 Speaker's platform
 Embroidery yarn
 Pair on a bicycle
 Operation Overlord, for the
 Normandy invasion
 Goes out with
 No longer tied, as shoelaces
 Raspy-voiced
 Bring about
 Breather
 Medicine bottles

WOOF CLUES

Wedding party? (5)
 Seasickness (6)
 Finish in the top three (5)
 Dashed headlong (7)
 Edict (6)
 Fly like an eagle (4)
 More eldritch (6)
 Cuts into cubes (5)
 Emphasize (6)
 Walk stealthily (6)
 Fairy tale starter (4)
 Dragon-slaying hero, e.g. (7)
 Prom tux, usually (6)
 Trig ratio (4)
 Had an inspiration? (7)
 Two times (5)
 Hypnotic depressant, for short (4)
 Cantaloupes, e.g. (6)

LOGIC PLAY

Pathfinder

A path of 36 consecutive numbers, connected horizontally or vertically, and never diagonally, will complete this grid. Some numbers are given to get you started. Can you place a number in each empty cell to create the only correct path?

End view

Place the letters A, B, and C into this grid so that each letter appears exactly once in each row and column, with the other two cells in each row and column left blank. Each letter outside the grid indicates the letter that must appear first in its respective row or column (reading in from the edge of the grid closest to the letter, and skipping any blank cells). Can you get the correct pattern? The solution is unique.

Gimme five

A pentomino is a tile made of five squares joined edge to edge. Divide this grid into five pentominoes, each containing the five letters A, B, C, D, and E. The regions will not all have the same shape. The solution is unique.

B	E	A	C	B
E	A	C	A	D
D	D	A	B	E
B	C	D	E	C
A	B	E	C	D

Match play

The grid contains unburnt matches of different sizes. You may burn any amount of each match, or leave the match unburnt. You "burn" a match by shading segments from the head (rounded end) to the tail, without skipping segments. The numbers outside the grid indicate the number of burnt segments in the corresponding row or column. Can you shade in the burnt segments to "match" the numbers?

Spymaster

Deduce a secret number made of four different digits 1 through 9. The chart shows four guesses at the number, and a score for each guess using marbles. Any digit that appears in the secret number in the same position as in the guess is scored with a black marble. Any digit that appears in the secret number in a different position than in the guess is scored with a white marble. Any digit that is not in the secret number does not get a marble. It's up to you to determine which digits are indicated by the marbles. Can you figure out the four-digit number?

8	1	7	3	●	○	○
2	9	4	6	●		
2	1	3	9	○		
4	5	2	7	●	○	

NUMBER PLAY

	+		-		=6
×		÷		+	
	÷		+		=3
÷		×		-	
	÷		+		=9
=3		=6		=3	

Criss-cross math

Place the digits 1 to 9, once each, into the empty cells so that the three rows across and three columns down form correct arithmetic statements. All calculations involve only positive whole numbers and should be performed from left to right and top to bottom, ignoring mathematical order of operations.

Hip! Hip! Array!

Place a number in each empty cell of this array so that the numbers in the top and middle cells in each column sum to the number in the bottom cell. Also, in each row, the numbers in the first two cells sum to the number in the third cell; the second and third sum to the fourth; and the third and fourth sum to the fifth. When you've filled the array, convert the shaded numbers to letters (1 = A, 2 = B, etc.) and rearrange the letters to spell out some model behaviour.

	6			
7				41
			44	

Times square

Each of the seven letters used in this word square represents a different digit 1 through 7. The numbers outside the grid show the results of multiplying the values of the letters in each row and column. Can you determine the values of the letters and fill the empty grid with their corresponding numbers?

F	O	O	L	150				
A	S	I	A	112				
I	L	L	S	28				
L	O	S	T	60				
168	50	70	48					

Wine white

This sounds like a grape gripe! In this addition alphametic, each digit has been replaced with the same letter everywhere it appears. Different letters stand for different digits. None of the three numbers starts with zero. Can you find the unique solution?

$$\begin{array}{r}
 \text{NOT} \\
 + \text{PINOT} \\
 \hline
 \text{AGAIN}
 \end{array}$$
