Subject: RE: TB outbreak in Pang

Hi

Can you please provide more information on this email.

1. How many active cases of TB have been diagnosed?
2. How many clients are currently on LTBI?

Active TB, sadly, as you know, is common in multiple of our communities so just wanting to get a sense of what is happening here in Pang.

Thanks,
Chris

Subject: TB outbreak in Pang

Good afternoon,

I just wanted to inform you that we have a declared TB outbreak in Pang. We would normally require community screening, but we were told the CPHO will authorize due to the staffing situation. Our PHN is trying to track one person who is believed to be at source of the outbreak. Updates from her will be coming or you may hear from the CPHO office. Yves.
